Base Unit: Piece

### ITEM NUMBERS

10140231000 (GTIN: 0794023001815)

### COLORS

Desert

### SIZES

NoSize

### PRODUCT DESCRIPTION

The M16 series is one of the most acclaimed lines of folding knives conceived by Kit Carson. The 13DSFG was designed with requirements from military procurement specialists for desert environments.

With a weight of 113g, a serrated tanto blade length of 89mm, and a total of 208mm, this knife is a perfect choice when cutting power blends with precision and rigidity. It incorporates two Carson Flippers - a somewhat unique feature among folding knives. The 3mm thick blade made of 1.4116 steel is rigged with a reliable cross guard and coated with Titanium Nitride.

The double opening mechanism consists of a thumb stud and a flipper being the lower hilt.

The handle is made of a tan G10 laminate and mounted to a dual stainless steel liner with a reliable Liner Lock mechanism.

Two-stage automated liner lock was integrated into the design to prevent accidental disengage of the locking mechanism. The removable pocket clip is available for both right and left-hand users.

The M16-13DSFG is a simple yet durable knife for heavy use without needless frills and fireworks.

### PRODUCT DESCRIPTION

The M16 series is one of the most acclaimed lines of folding knives conceived by Kit Carson. It was conceived for demanding works in the field while still having appealing looks.

With a weight of 65g, a serrated tanto blade length of 76mm, and a total of 181mm, this knife is a perfect choice when cutting power is blended with precision and rigidity.

The 2mm thick blade made of 1.4116 steel is rigged with a reliable cross guard and coated in an anti-corrosion black EDP finish. The double opening mechanism consists of a thumb stud and a flipper being the lower hilt.

The handle is made of glass-reinforced nylon and is mounted to a dual stainless steel liner and matched with a reliable Liner Lock mechanism. The removable pocket clip is available for right-hand users.

The M16-10KZ folder is a simple yet durable knife for heavy use without needless frills and fireworks.

PRODUCT DESCRIPTION

Designed and manufactured by Smith & Wesson, this folding karambit knife is a perfect companion that performs exceptionally well in tactical situations, survival, and outdoor activities.

The folder weighs 0.133 kg, has a blade length of 75 mm, and a total of 190 mm. The knife incorporates a classical karambit-shaped blade with a flat grind that opens with a convenient thumb hole. The product guarantees exceptional tip strength with excellent penetrating properties and cutting power.

CK32C Karambit incorporates a robust Liner-Lock system that ensures safety during use and prevents the mechanism from accidentally disengaging and folding during use.

The 7Cr17MoV stainless steel blade is manufactured with a black and stone wash and anti-reflective finish. It withstands even the harshest conditions and remains sharp for an extended period of time. Corrosion resistance, exceptional durability, and outstanding sharpness are essential points that make this knife highly useful for users.

The handle is made of stainless steel covered with a titanium protective coating. The handle has a thumb ramp on the spine, protecting the hand from slipping on the blade while working. It also features cut-outs for fingers that serve as a stable support. The knife has a removable clip that allows you to conveniently carry it in your pockets.

Every user will appreciate this item's modern style, multi-use, convenience, and safe carry. Outstandingly, the knife links high hardness and superior appearance. Smith & Wesson knives are renowned for their quality, performance, and longevity, consistently meeting and exceeding customers' expectations.

All item components have been designed and crafted using materials that meet a precise purpose.

PRODUCT DESCRIPTION

Designed and manufactured by G&G, SG552 is a high-quality replica of one of the most recognizable Swiss subcompact assault rifles. Manufactured from steel, metal alloys, and polymers, this 490/747mm long replica is fed from a realcap magazine. SG552 weighs around 2800g and shoots in a semi and full-automatic mode.

The replica is mainly made from steel and high-quality polymers reinforced with glass fiber making it lightweight and highly durable. Only the barrel is made of aluminum alloy. Main elements like the body, bipod, muzzle device, trigger/trigger guard combo, RIS rails, and safety lever are machined from steel. The side folding stock, pistol grip, and handguard were manufactured from a polymer. The folding stock made of high-quality polymer is comfortable to use.

At the front, we can find a polymer RIS handguard with a rail at the top. This setup allows the user to attach different accessories suitable to their preference or mission requirements.

The barrel is outfitted with a 14mm CCW thread and can take different muzzle devices, suppressors, and tracers. The battery is placed in the handguard. Thanks to high-quality materials and peak performance, the SG552 is an ideal choice for new players and veterans looking for a premium-class replica in a reasonable price bracket.

### ITEM NUMBERS

10143106000 (GTIN: 9010109039369), 10143122000 (GTIN: 9010109039352), 10143130100 (GTIN: 9010109095310), 10143176500 (GTIN: 9010109095341)

### COLORS

Black, OD, Coyote, Everglade

### SIZES

NoSize

### PRODUCT DESCRIPTION

MMV Vest is designed to provide a large surface for carrying equipment thanks to the full MOLLE system. It can be used in combination over a soft ballistic vest or as a single layer vest. It is made of durable 600D fabric to ensure durability while keeping a low weight.

Its conceptual design allows maximum carrying comfort and has numerous practical characteristics. Shoulder and Neck are padded and coated with anti-slipping material. Around the shoulders are located four flexible straps for fixing Comtac cables or hydration tubes.

It's constructed of 3 parts: back and two front flaps secured together using high-quality YKK zipper with additional snaps closure. Each flap is outfitted with large inner pockets with zipper closure.

In the upper back area is located a rescue handle for quick and easy evacuation out of danger zone.

The vest is in a universal size and it can be fitted to the user by hooks and loops straps on the shoulders and side belts.

## DACC Carrier

Brand: INVADER GEAR  
Master-No.: 101432  
Item Category: Plattenträger  
Base Unit: Piece

### ITEM NUMBERS

10143206000 (GTIN: 9010109039406), 10143222000 (GTIN: 9010109039390), 10143230100 (GTIN: 9010109053921), 10143276500 (GTIN: 9010109095334), 10143279800 (GTIN: 9010109053945)

### COLORS

Black, OD, Coyote, Everglade, Flecktarn

### SIZES

NoSize

### PRODUCT DESCRIPTION

DACC Carrier Vest is designed to provide lightweight multi-purpose low profile carrier for ballistic plates with a large surface for carrying equipment thanks to the full MOLLE system.

It features a quick-release system for easy removal in case of injuries or fall into deep water. The vest is made of robust 1000D Nylon fabric to ensure long time durability even in most demanding conditions.

In the upper back area are located hooks and loops panels for unit ID or morale patches and a rescue handle for quick and easy evacuation out of danger zone.  
This vest can be equipped with "Small Arms Protection Inserts" (SAPI plates) or similar hard ballistic plates. It can be also equipped with side plates.

In case of need for improved airflow, the DACC can be configured in the lightweight version by removing both sides and securing the vest with fastex buckles.

It is in a universal size and it can be fitted to the user by hooks and loops straps on the shoulders and adjustment holes hidden in the lower back.

### PRODUCT DESCRIPTION

The "Interceptor Body Armor Vest" is designed as great quality and perfect for re-enactment use replica of the standard issued US Army vest which was used in numerous conflicts around the globe. It was thought to give the user really extensive protection with detachable modules for the crotch, upper arm areas and neck - which make this vest a great solution for Close Quarters Combat environment.

The vest is made of durable 600D fabric to ensure durability while keeping a low weight.

The whole surface of the vest is covered MOLLE system which gives the user the ability to freely configure the additional pouches according to the mission requirements.

Inside, the vest has space for ballistic inserts. Usual SAPI plates and dummies can easily be inserted.

On the each arm, upper front and back area are located hooks and loops panels for unit ID or morale patches. Above the upper back is located a rescue handle for quick and easy evacuation out of danger zone.

### PRODUCT DESCRIPTION

Over 20 years of development, application in the working environment and constant improvement make the "Original"-Series the best gloves of their kind. No other product achieves a higher degree of functionality and quality and offers more sensibility at the palms of the hand, guaranteeing precise working conditions.

The long living synthetic leather fits perfectly to every hand and makes the wearer feel like wearing a second skin. Therefore it is no wonder that the "Original"-products are the most commonly used gloves when it comes to all kinds of repair work. They are also very intensively using in all military branches including special operations forces. The reinforced thumb-surface-area and the high quality of the material make these gloves extremely reliable.

- Manufactured and developed for a great field of applications
- Long living synthetic leather
- Seamless synthetic leather palms for maximum sensibility
- Thermal Plastic Rubber hook and loop cuff closure provide a perfect fit
- Machine washable

The "Original"-Series - the best combination of flexibility and protection.

### PRODUCT DESCRIPTION

Over 20 years of development, application in the working environment and constant improvement make the "Original"-Series the best gloves of their kind. No other product achieves a higher degree of functionality and quality and offers more sensibility at the palms of the hand, guaranteeing precise working conditions.

The "M-Pact 2"-Model is the tank amongst the Models of the "Original"-Series. From application in racing to employment in industry and even the use with heavy, dangerous machinery in the oil-industry and critical military tasks - this glove knows no boundaries. Anatomically designed, it provides very high comfort and fits snugly when working, despite the flexible accordion knuckle with high density EVA foam padding. The rubberized fingertip panels provide excellent gripping power and durability, prevent crushing-injuries and ensure security when working under dangerous conditions.

- Maximum protection, without compromise
- TPR-finger protection
- Excellent grip at the palms of the hand
- Anatomically designed for highest amount of comfort
- Machine washable

The "Original"-Series - the best combination of flexibility and protection.

PRODUCT DESCRIPTION

Invader Gear has been founded in 2004 and has ever focused on equipment offering an outstanding price/performance ratio. The brand mainly offers a large selection of tactical clothing in modern designs in a wide range of colors and camouflage patterns and also all kind of nylon tactical equipment like vests, plate carriers, MOLLE Pouches, backpacks, protective pads, slings and many more products which follows the same philosophy. XPD Pads are lightweight and low profile protection which can withstand even the harshest conditions. They are designed to efficiently distribute impact energy to protect the joints, and thanks to the implementation of CoolMax material on the inside the heat build-up is reduced. The back straps are made from elastic material and their size can be adjusted to personal preference of the user. Bonus feature are quick detach hooks.

### PRODUCT DESCRIPTION

The Desert Warrior 4.3, manufactured by WE, is a full metal, semi-automatic replica of one of the most iconic pistols in the world. It was launched with the explicit mission of enhancing certain essential features of 1911-style handguns. It is powered by green gas, weighs 990g, has a length of 202 mm, and offers a magazine capacity of 15 rounds. The Desert Warrior 4.3 uses a 110 mm long inner barrel and generates approximately 300 FPS.

This model of the replica has main improvements such as improved grooves on the slide, high visibility iron sights, ambidextrous safety lever, and thread in the barrel. The handgun utilizes scales with a non-slip serrated texture on the grip surfaces. It also features a Picatinny rail for mounting light amplification modules and laser designators.

Solid and high-quality item offers primarily metal external construction. Only grip panels are injection molded from polymers. On the inside, WE provided quality parts that ensure long-term usage and precision of each shot.

The Desert Warrior 4.3 implements a robust gas blowback (GBB) system that imitates recoil and slide action during firing. It provides an exceptional and realistic user experience, like shooting an authentic pistol. Furthermore, the handgun offers an adjustable hop-up mechanism to improve the BB's accuracy and stability during the shot.

Whether you're an experienced airsoft professional or a newcomer, this replica model is an excellent choice for anybody searching for a reliable sidearm.

### PRODUCT DESCRIPTION

The M21 series is one of the most acclaimed lines of folding knives conceived by Kit Carson. It is a revised and enlarged alternative to the M16 and M18 lines of blades with better performance and efficiency.

With a weight of 181g, a recurve serrated spear-point blade length of 101mm, and a total of 236mm, this knife is a perfect choice when brute strength mixes with high prowess and cutting power.

The 3.5mm thick blade made of 1.4116 steel is rigged with a reliable cross guard and covered in gray matte paint for anti-reflection and rust-resistance purposes.

The double opening mechanism consists of a thumb stud and a flipper being the lower hilt. The handle is made of black G10 laminate and mounted to a dual stainless steel liner with a reliable Liner Lock mechanism.

Two-stage automated liner lock was integrated into the design to prevent accidental disengage of the latch mechanism. The removable pocket clip is available for both right and left-hand users.

The M21-14G is a solid and reliable knife that can easily find its way into EDC and outdoor activities.

### PRODUCT DESCRIPTION

The M16 series is one of the most acclaimed lines of folding knives conceived by Kit Carson. The 13SFG was designed with requirements from military procurement specialists.

With a weight of 113g, a serrated tanto blade length of 89mm, and a total of 208mm, this knife is a perfect choice when cutting power blends with precision and rigidity. It incorporates two Carson Flippers - a somewhat unique feature among folding knives.

The 3mm thick blade made of 1.4116 steel is rigged with a reliable cross guard and coated with Titanium Nitride. The double opening mechanism consists of a thumb stud and a flipper being the lower hilt.

The handle is made of black G10 laminate and mounted to a dual stainless steel liner with a reliable Liner Lock mechanism.

Two-stage automated liner lock was integrated into the design to prevent accidental disengage of the locking mechanism. The removable pocket clip is available for both right and left-hand users.

The M16-13SFG is a simple yet durable knife for heavy use without needless frills and fireworks.

PRODUCT DESCRIPTION

The Tactical XT is a high-performance, economical goggle designed specifically for tactical operations.

The 2.6mm high-impact lenses provide dependable impact protection, and the 40mm strap has slides for easy strap adjustment. The roomy Striker frame is designed to fit over most eyeglasses.

The ESS Tactical XT is U.S. Federal OSHA compliant, and meets and exceeds ANSI Z87.1-2010, the U.S. Military .22 caliber ballistic impact test MIL-DTL-43511D (Clause 3.5.10), and CE EN 166.

All Striker Series lenses provide 100% UVA/UVB protection and distortion-free optical clarity.

- Roomy frame fits over most prescription eyewear
- Advanced ESS ClearZone FlowCoat lenses eliminate fog inside & prevent scratches outside
- Full-perimeter ventilation & filtration system minimizes lens fogging & filters airborne particles
- 2.6mm high-impact Polycarbonate lens
- Distortion-free optics & 100% UVA/UVB protection

PRODUCT DESCRIPTION

The M16 series is one of the most acclaimed lines of folding knives conceived by Kit Carson. It was designed for demanding works in the field while still having appealing looks.

With a weight of 99g, a serrated spear-point blade length of 89mm, and a total of 209mm, this knife is a perfect choice when cutting power blends with precision and rigidity.

The 3mm thick blade made of AUS 8 steel is rigged with a reliable cross guard and finished with a Bead Blast technique. The double opening mechanism consists of a thumb stud and a flipper being the lower hilt.

The handle is made of black glass-reinforced nylon and mounted to a dual stainless steel liner with a reliable Liner Lock mechanism.

Two-stage automated liner lock was integrated into the design to prevent accidental disengage of the locking mechanism. The removable pocket clip is available for right-hand users.

The M16-13Z EDC folder is a simple yet durable knife for heavy use without needless frills and fireworks.

PRODUCT DESCRIPTION

Designed and manufactured by G&G, GR14 EBR is a high-quality replica made as a part of the Intermediate series. The idea was to deliver a metal-made model with superior internal mechanisms, the best possible materials, and an affordable price.

This 930/1194mm long replica is fed from a hicap magazine, weighs around 4500g, and shoots in a semi and full-automatic mode.

At the front, we can find an aluminum quad RIS handguard with a rail at the top. This setup allows the user to attach different accessories suitable to their preference or mission requirements.

Main elements like the receiver, rail system, outer barrel, and gas tube are machined from high-quality metal alloys. The pistol grip, handguard, and stock are manufactured from polymer, and a few small parts like sights, magazine, and sling attachment points are made from steel.

The retractable stock made of high-quality polymer is comfortable to use and easy to handle in confined spaces and stash. The battery is placed in the lower part of the handguard. Hop-up unit is placed in the receiver - releasing the charging handle produces a surprisingly neat sound mimicking the real action.

Thanks to quality materials and high performance, the GR14 EBR is an ideal choice for new players and veterans looking for a premium-class replica in a reasonable price bracket.

PRODUCT DESCRIPTION

The 553 Red Dot, made by Aim-O, is a high-quality and solid replica of one of the market's most popular and widely used aiming devices. Special forces, law enforcement agencies, and competitive shooters employ it with huge success.

This sight is compatible with rifles, carbines, shotguns, and submachine weapons fitted with a Picatinny rail interface system. The 553 device weighs 430g, uses two AAA batteries for reticle illumination, and is machined from aluminum alloy. Additional non-reflective and scratch-resistant coating provides adequate protection from physical damage and atmospheric conditions. 553 is also integrated with a QD mount for quick and easy attachment.

The design, with a lens window of 30x23 mm, offers a wide view angle and improved visibility. It incorporates a red "circle with a dot" aiming reticle with adjustable brightness settings, windage, and elevation. This feature guarantees ultra-quick and accurate target acquisition.

Traits such as an anti-reflective, scratch-resistant surface, multi-layer lens coating, and shockproofing design confirm durability and robustness.

### PRODUCT DESCRIPTION

- Disposable surgical mask made of 3-layer synthetic fleece
- With comfortable, soft, latex-free elastic straps for fastening around the ears
- This mask protects your surroundings from droplets and aerosols that you exhale
- The masks are 2-coloured, blue outside and white inside. This makes it clear which side must be worn on the outside
- Only suitable for single use, do not use several times!

Wear and use the mask correctly:

Visually inspect the mask for damages before use. If it is damaged, dispose the mask. Pull the strap around your ears, expand the mask over your nose and chin, and make sure it fits tight. Do not touch the surface of the mask when putting it on, while wearing it or when taking it off. Replace the mask if it is contaminated with body fluids. Only remove the mask by touching the ear loops to prevent contamination of fingers and through the fingers themselves. Wrap and dispose of the mask properly, then wash your hands thoroughly with soap. The mask is for one time use only!

Why we sell masks:

We have a very good worldwide network of suppliers and logistics companies, which enables us to purchase and transport products even in case of bottlenecks. We can also use our network to have the products inspected on site before shipping to avoid unpleasant surprises. Several of our employees witnessed the SARS epidemic in Taiwan in 2002 and are very aware of the importance of hygiene masks as part of a comprehensive pandemic preparedness, even if this was repeatedly downplayed by the authorities in Switzerland, especially at the beginning of the pandemic, for reasons that are not comprehensible. We were already very concerned about the outbreak of the novel coronavirus SARS-CoV-2 in mid-January, and as a precautionary measure we put aside some masks, which we have since shared with family members, friends and also business partners. We were often asked where we got the masks from and whether we could procure additional supply. We have also noticed that often disproportionately high prices are demanded and would like to also achieve with our offer that the market price for masks will be further reduced.

PRODUCT DESCRIPTION

Designed and manufactured by Walther, this folding knife is a perfect companion that performs exceptionally in everyday tasks, tactical purposes, camping, outdoor activities, survival gear, fishing, and hiking.

The item weighs 189g and has a blade length of 85 mm and a total length of 200 mm. The knife features a spear-point blade with a hollow grind composed of serrated and smooth parts, significantly enhancing its range of uses and allowing for cutting a wide variety of products and materials. Practical features such as the integrated flipper and thumb stud help to unfold the knife - these solutions are convenient for both right- and left-handed people and allow the use of the knife comfortably, even when wearing gloves. The item features a finger ramp with jimping on which user can rest their thumb while working. Furthermore, the product includes a robust Liner-Lock mechanism that ensures safety during use and secures the blade against accidental folding.

The 440C steel blade is manufactured with a satin finish and a hollow grind. Thanks to the blade geometry and steel composition, it withstands harsh treatment, remains sharp for an extended time, and is easy to sharpen. Corrosion resistance and durability are essential points that make this knife an interesting choice for users.

The profiled and ergonomic handle, with the aesthetic Walther logo, has black anodized aluminum scales. Moreover, it enhances control and provides sufficient grip, resistance to damage, easy operation, and comfort. At the end of the handle, there is a glass breaker and a hole for a safety rope. The item incorporates a steel clip that supports the everyday carrying of the knife in a pocket.

Every user will appreciate this item's modern style, multi-use, convenience, and safe carry. Walther knives are renowned for their quality, performance, and longevity, consistently meeting customers' expectations.

PRODUCT DESCRIPTION

Designed and manufactured by Walther, this folding knife is a perfect companion that performs exceptionally in everyday tasks, tactical purposes, camping, outdoor activities, survival gear, fishing, and hiking.

The item weighs 0,22 kg, has a blade length of 100 mm, and a total of 235 mm. The knife incorporates the tanto blade and hollow grind. It is partially serrated, making cutting ropes, belts, and fibrous materials simpler. Practical features such as the integrated flipper and pin help to unfold the knife - these solutions are convenient for both right- and left-handed people and allow the use of the knife comfortably (even when wearing gloves). Furthermore, this top-quality product includes a robust Liner-Lock mechanism that ensures safety during use (effectively protects the blade against accidental folding).

The 440C stainless steel blade is manufactured with a black-washed finish. It withstands even the harshest circumstances and remains sharp for an extended period of time. Corrosion resistance and exceptional durability are essential points that make this knife significantly precious for users.

The profiled and ergonomic handle, with the aesthetic Walther logo, has aggressive texturing and black anodized aluminum scales. Moreover, It enhances control and provides sufficient grip, resistance to damage, easy operation, and comfort. Furthermore, the item incorporates a steel clip that supports the everyday carrying of the knife in a pocket. Additionally, at the end of the handle is equipped with a glass breaker and a hole for a safety rope.

Every user will appreciate the modern style, multi-use, convenience, and safe carry of this item. In an outstanding way, the knife links high hardness and superior appearance. Walther knives are renowned for their quality, performance, and longevity, consistently meeting and exceeding customers' expectations.

### PRODUCT DESCRIPTION

Compact-sized holographic sight designed and manufactured by EoTech. CNC machined from aluminum and anodized in a matte black coating. A weight of 255g and dimensions of 95x53x63mm place it in the compact-sized class of devices on the market. The sealed construction makes it water, dust, and fog-resistant as well as shockproof. The 30x23mm lens glass is covered in anti-scratch and reflection multi-coating. A single 1 MOA-sized dot with a 68 MOA ring with a 1/2 MOA adjustment value is displayed via an integrated laser emitter with twenty brightness levels and ten for NV mode. This combination forms the reticle with a shotgun spread pattern. With no parallax and unlimited eye relief, XPS3-0 guarantees quick and accurate target acquisition in all weather and light conditions and over long distances. The power is provided by a single CR123A battery in a cap-secured housing, giving it a running time of 1000 hours at a medium brightness setting. Picatinny Interface mount provides solid and stable zero retention in the harshest conditions.

Extreme Performance Black Gas 500ml - Extreme Pressure = Extreme Performance

Why you should have it?

- Ideal for all seasons, including winter.
- Exceptionally powerful.
- Offers stable gas pressure and exceptional trajectory control.
- Excellent low-temperature efficiency.

Extreme Performance Black Gas is a super-high performance gas among Nimrod Tactical propellants - the product work well during all seasons (including severe winters) without any noticeable loss in performance or range.

The PP Black Gas offers stable gas pressure, exceptional trajectory control, and excellent low-temperature efficiency, making it an outstanding choice for use in all airsoft replicas from early spring to late autumn.

Other Nimrod Tactical gases are also available in our webshop, be sure to check them out!

### PRODUCT DESCRIPTION

0.28g Bio Precision BBs 3570rds - Biodegradeable Precision

Why you should have it?

- Precisely manufactured.
- Polished surface.
- Truly biodegradable.
- Perfect for 6.01 and 6.03 inner barrels.
- 0.28g weight of a single BB.

Bio BBs made by G&G are characterized by excellent surface processing and first-class flight behavior. Compliance with strict norms and a rigorous quality check process ensures the BBs' outstanding and repeatable performance, making them an excellent choice for 6.01 or 6.03 precision barrels.

In contrast to the "organic" BBs from other manufacturers, these are actually 100% biodegradable - in a conventional compost heap, the BBs decompose completely within around 120 days.

Other G&G BBs, airsoft replicas, and accessories are also available in our webshop, be sure to check them out!

PRODUCT DESCRIPTION

Half face mask designed to provide protection to the jaw and nose. It is made of robust steel net which can be shaped to the unique user anatomy. Durability against adverse weather conditions and rust is ensured by a polymer layer.

The mask is secured on the head with a number of elastic and adjustable bands. The whole circuit is covered with a fabric for user’s comfort.

This type of protection is very popular not only among fans of military games but it’s also a choice of protection against low-velocity debris among military and law enforcement personnel, especially while breaching obstacles like doors with shotgun rounds or explosives

### PRODUCT DESCRIPTION

A compact and super-sturdy flashlight developed strictly for military and tactical applications. Thanks to the low weight of only 140g and length of 125mm, Sidewinder smoothly fills the role of a robust "tac-light" and provides optimal performance in its size class. The housing is injection molded from a high-quality, impact-resistant polymer for exceptional durability and weather resistance. Notched surfaces furtherly improve grip. Thanks to the sealed construction and an IPX7 rating, Sidewinder is waterproof to 1m for 30 minutes and impact-resistant up to 3m. The installed polycarbonate lens is layered in a scratch-resistant multi-coating that further enhances the light transmission. The performance and runtime depend on the used LED and operating mode. Sidewinder works in 5/25/60/100% and 100% strobe output with a runtime of no less than 5.5 hours for white LED and up to 200 hours for IR and red LED. The Military model is assembled with white, red, IR, and blue LEDs. Two alkaline or lithium AA batteries provide power for the flashlight. The latter guarantees extended operation in extreme temperature environments. A metal cable is tethered to secure the battery cap to prevent loss and acts as the locking device. A rotary knob with a push button provides an easy and smooth way to choose the correct LED and power output. Thanks to the compact size, easy attachment, and powerful LEDs, Sidewinder Military is a perfect choice for military and tactical applications.

PRODUCT DESCRIPTION

A polymer-made adapter manufactured by Streamlight and explicitly designed for attaching the Sidewinder family of flashlights to helmets.

The product is injection-molded from high-quality polymers and is fitted with a metal clamp attached via two screws. The mount allows the installation of the flashlight mentioned above on various helmets in a genuine, hands-free manner.

PRODUCT DESCRIPTION

If your hop-up adjustment is not having a big effect on the hop-up of your BBs, then it probably means that your hop-up packing is worn down and is not gripping the BB properly before it is fired out. A new hop-up packing will allow more accurate hop-up adjustments. Best used on guns that shoot below 400fps. If your gun shoots above 400fps, then opt for the hard type hop-up packing instead. Especially recommend to use this hard type hop-up packing onto upgraded AEG as well for improving full auto mode shooting effectively.

PRODUCT DESCRIPTION

If your hop-up adjustment is not having a big effect on the hop-up of your BBs, then it probably means that your hop-up packing is worn down and is not gripping the BB properly before it is fired out. A new hop-up packing will allow more accurate hop-up adjustments. This hard type packing is designed to match high power upgrades at 400fps+. High power upgrades require a harder hop-up packing since softer material may deform from the higher power. However if your gun shoots below 400fps, then stay with the soft type packing since otherwise this hard type will not grip the BB properly on low power configurations. Especially recommend to use this hard type hop-up packing onto upgraded sniper rifle as well for improving semi mode shooting effectively.

PRODUCT DESCRIPTION

G&P carefully reproduced this fully licensed and extremely detailed Magpul M4 MOE, and as usual, they did a splendid job: it has a magnificent finishing with first-class features, looking particularly attractive. As if that is not enough, this weapon is very robust and highly reliable, making it an immensely popular model. As the battery is to be placed in the stock tube, we would recommend to use 7.4V stick type Li-Po batteries with mini T-Plug connector. Of course, this masterpiece could not be sold without MOE stock, grip and hand guard, as well as a PMAG and MBUS rear sight.

### PRODUCT DESCRIPTION

G39C, manufactured by WE, is a full metal, semi and full-automatic replica powered by green gas. It weighs 2.9kg, has a length of 690 mm, and offers a magazine capacity of 30 rounds. G39C uses a 220 mm long inner barrel and generates approximately 335 FPS.

The replica incorporates practical features such as an upper transport grip (integrated carry handle), ergonomic and adjustable stock, customizable front and rear sights, and bolt catch. In addition, the product comprises a reloading handle, integrated front and rear sling swivel, and a fire mode selector that provides comfortable operation. The replica provides gas efficiency with high velocity, accuracy, and range. G39C features a Picatinny rail (on top, bottom, and side) for mounting light amplification modules and laser designators.

The solid and high-quality construction of the replica is injection molded from polymers with additional metal elements like the barrel, rails, and muzzle device. On the inside, WE provided quality parts that ensure long-term usage and precision of each shot.

G39C implements a robust gas blowback (GBR) system that imitates recoil and mechanical action during firing. It provides an exceptional and realistic user experience, like shooting an authentic weapon. Furthermore, the rifle offers an adjustable hop-up mechanism to improve the BB's accuracy and stability during the shot.

Whether you're an experienced airsoft professional or a newcomer, this replica model is an excellent choice for anybody searching for a reliable primary replica.
